Construction Update: Ridgecrest Sanitary Sewer Extension Project

Construction on the Ridgecrest Sanitary Sewer Extension Project is anticipated to start on October 2, 2017.

The project includes the extension of sanitary sewers to Bigwood Drive, Blueberry Ridge, Fawn Lane, Kelly Drive, and Gary Drive from the intersection of Kelly Drive to the end of the cul-de-sac. Following the completion of the sewer installations the contractor will repair the roads by reconstructing the pavement and replacing sidewalks and curbing in kind.

The work occurring this fall will include the installation of sanitary sewers on Gary Drive and Kelly Drive. The road and sidewalks will be repaired with temporary patches until permanent road and sidewalk repairs are completed later next year. The contractor and/or engineer will provide notices to individual property owners to coordinate the location of proposed sanitary sewer services.

The anticipated work hours are between hours of 7:00 a.m. and 3:30 p.m. The sewer installation on the remaining streets of Bigwood Drive, Blueberry Ridge, and Fawn Lane will be completed next year and repaired with temporary patches. The final road, sidewalk, and curb repairs are anticipated to be completed in the late summer/fall of 2018.

Further inquiries may be directed to the City of Westfield Engineering Department, (413) 572-6219.
